Attn: Domain Registration Department
Kathmandu

Subject: Request for Free .np Domain Registration for Completed Frontend Website

Dear Sir,

I hope this message finds you well. I am writing to request a free domain registration under the .np country code top-level domain (ccTLD) for my completed frontend website.

Website Details: Personal Portfolio

Website Name: Personal

Desired Domain Name: **ayushkuikel.com.np**

I have recently finished developing a frontend website that showcase "My website is a visual portfolio displaying my frontend projects and web design expertise. It's intended to showcase my skills to potential clients and collaborators in the web development field.". To make it accessible to a wider audience, I am eager to have it hosted with a dedicated .np domain name. I have reviewed the domain registration guidelines provided by the Nepal Telecommunications Authority and am fully prepared to adhere to the necessary procedures and requirements.

I kindly request your assistance in facilitating the domain registration process for ayushkuikel.com.np. If any specific documents or information are needed, please let me know, and I will provide them promptly.

Thank you for your consideration. Your support in helping me share my completed frontend website with a larger audience is greatly appreciated.

Best regards,
Ayush Kuikel
